学習法開発にあたって大切にしたこと

- 目先のことにとらわれず、高校数学ができる力を早くつけること
- 教わるのではなく、自学自習で学習できること

KUMON

What was important when developing the Method

- Without being restrained by the present, aim at letting children obtain the skills to do high school math as soon as possible.
- Rather than teaching, aim for children being able to study by themselves through self-learning.

KUMON

KUMONが受け入れられている要因

- 親が子どもにつけたい力は共通である（高度な基礎学力、自ら学ぶ力）
- 個人別だから、いつでも誰でも受け入れられる
- 地域を愛する指導者がいる

KUMON

Why Kumon has been accepted the world over.

- The skills parents want their children to obtain are common. (strong basic learning skills, the ability to learn on one's own)
- Anyone at anytime can study because of Individualized instruction
- There are Instructors who love their communities.
